

Physical Culture Association.

Judging Assessments

This document will outline the requirements of each class and what is expected of competitors during both pre-judging and night shows. These may be subject to change and competitors will be notified of any such changes prior to events and reiterated at the competitors meeting at contests.

On participating in the Physical Culture Association Championships, the competitor agrees to adhere to the rules of the Association and will respect all their fellow athletes, all judges and officials.

All athletes therefore agree to accept and respect the judging panel decisions as final.

All classes will be judged on the athlete's attitude, confidence, posing, poise and commitment to their time on stage.

All categories will be put on at each qualifier if the minimum numbers of competitors are met to quantify a competition, or at the promoters discretion. Minimum number is THREE.
All high numbered classes will be split, also at the promoters discretion.

No Props/Accessories to be used in posing routines in any category.

Pre-Judging

All competitors will stand in one straight line in the centre of the stage in numerical order and in 'front position' no posing at this point. The judges will make their first assessment.

All competitors will then perform 4 quarter turns to the right on instruction from the head judge. The line will then be reversed/split and another set of quarter turns performed. The line will then be split in half and competitors will be placed at each side of the stage. Half the competitors will then be called to the centre of the stage and another round of quarter turns performed and then return to their side of the stage. The remaining half will then perform quarter turns and return to the side of the stage.

All competitors will then perform compulsory poses in small groups (3-6 competitors) in numerical order. The compulsory poses are:

1. Front Double Bicep.
2. Front Lat Spread.
3. Side Chest.
4. Rear Double Bicep.
5. Rear Lat Spread.
6. Side Tricep.
7. Abdominals and Thigh.

**See below in explanations.

Promoting a healthy Ladies Bodybuilder, femininity, poise, personality and confidence.

Explanations.

Symmetry: The athlete should present a physique that has a shoulder width equal to their thigh width. Chest thickness equal to their glute thickness. Chest, back development to their quad, hamstring development. All with the taper in to the waist. Equaling the Symmetry of an x-frame.

Proportion: The athlete should present a physique that is equally development throughout muscle groups.

Balance: The athlete should present a physique that has equivalent dimension of muscle groups. Chest thickness to back thickness, bicep to tricep, quad to hamstring, calf to forearm to neck. With all tapered in at the waist.

Condition: In all the Men's classes, including Mens Physique and Muscle Model. All athlete should present a conditioned physique appropriate the the class of choice, that has a low amount of body fat allowing the judge to see the muscle separation of all muscle groups and definition throughout the competitor.

Condition: In the Ladies classes athletes should present a conditioned body appropriate to their chosen class. In all ladies classes a **Healthy, Feminine** physique WILL be encouraged, but with bone exposure and over dieting will NOT. All ladies will conduct themselves in a professional, athletic manner, with the individual conducting themselves with femininity, poise, personality, confidence and charisma.

**Ladies Toned Bikini competitors will not be encouraged not to have such a low body fat that muscle separation is evident, but the judge would expect to see evidence of fit shoulders, arms, back , firm glute hamstring area, flat midriff. All delivered through symmetry and balance.

**Ladies Masters Bikini competitors should present a feminine bikini figure with a body fat level lower than toned bikini, to allow muscle tone to be revealed. Judges will expect a good display of all muscle groups, but without deep separation and extreme striations or vascularity.

**Ladies Trained Bikini competitors will be encouraged to have a lower body fat than above class allowing some muscle separation to be evident, a well balanced athlete with clear evidence of a balanced muscular form.

**Ladies Body Fitness competitors will present an evolving figure for filling Judges expectations for a Body Fitness figure that shows, progressive evolution of the female form. Body fat levels are low enough for muscle separation and athletic endeavour to be awarded. Definition is encouraged, extreme vascularity and striations will NOT be. Athletes will display an athletic, feminine form.

**Ladies Toned Figure competitors should present a physique which is of a toned condition, firm and with a small level of body fat with the a developed appearance, without, muscularity, vascularity, muscle definition. Promoting femininity. The competitor will be expected to produce a figure which will allow the judge to see a fit and healthy athlete showing muscle groups without definition and separation.

**Ladies Athletic Figure competitors should present a physique which is more conditioned and with a lower body fat than the toned figure with femininity and poise. The competitor will be expected to produce a figure which will allow the judge to see an athlete showing muscle definition and separation. Any extreme vascularity or extreme striations allowing the feminine form to be lost, will not be rewarded.

**Ladies Trained Figure competitors should present a physique which is more conditioned and with the lower body fat the figure classes, but still holding on to femininity. The competitor will be expected to produce a figure which will allow the judge to see muscle definition and separation. Judges will not reward any ladies that present a figure with extreme vascularity or extreme striations or with any traits which could allow the feminine form to be lost.

**Ladies Bodybuilding (Pro/Am competition). Judges would reward a developed physique which is more conditioned than previous Ladies classes, but still holding on to femininity. The competitor will be expected to produce a figure which will allow the judge to see a feminine athlete showing muscle definition and separation through their endeavours. Without extreme vascularity or extreme striations, which could result in the feminine form to be lost.

International Status.

Once this status has been awarded, athletes will be monitored to remain at that level of competition, In an international pool of athletes. From this pool the PCA have the ability to award Pro statues or offer the return to National competition.
